

Environmental & Sustainability Policy

Overleaf Publishers Ltd · Version 1.0 · July 2026 · chainsawcourses.com

1. STATEMENT OF COMMITMENT

Overleaf Publishers Ltd is committed to operating responsibly and sustainably, and to minimising our environmental impact. We recognise that as a digital-first training provider, our operations have a substantially lower carbon footprint than traditional classroom-based training. We are committed to building on this advantage and continuously improving our environmental performance.

2. DIGITAL-FIRST DELIVERY

The Chainsaw Courses platform is delivered entirely online. This eliminates the need for learners to travel to a training venue for the theoretical component of their chainsaw education, significantly reducing associated carbon emissions. Key environmental benefits of our digital-first model include:

- No venue energy consumption for theoretical training delivery.
- No learner travel emissions for theoretical training.
- No physical printing of course materials (other than the optional companion manual).
- Server infrastructure hosted on Replit's cloud platform, which operates energy-efficient data centres.
- Video content delivered via Vimeo's CDN, which continuously invests in energy efficiency.

3. PHYSICAL MANUAL — PRINT OPTIONS

Where the Overleaf Chainsaw Manual is supplied as a physical printed book, we are committed to the following:

- The Manual is printed by UK-based printers using FSC-certified or recycled paper stock wherever possible.
- Print runs are managed to minimise waste — digital-only access is offered to learners who do not require a physical copy.
- Packaging for posted manuals is kept to a minimum. We endeavour to use recycled and recyclable packaging materials wherever possible, including recycled cardboard mailers and paper-based void fill in place of single-use plastics.

4. CHAINSAW OPERATIONS AND THE ENVIRONMENT

The Chainsaw Courses curriculum explicitly covers environmental and biosecurity responsibilities for chainsaw operators. This includes:

- Biosecurity procedures to prevent the spread of tree pests and diseases between sites (covered in the Platform's Biosecurity & Hazard Map tool).
- Correct disposal of chainsaw bar oil, fuel, and chain bar oil to prevent ground and water contamination.
- Recognition of statutory tree health containment zones (ash dieback, oak processionary moth, etc.).
- Responsible timber processing and handling to minimise waste.

5. WASTE AND RESOURCE MANAGEMENT

As a digital business, our physical waste is minimal. We are committed to:

- Minimising single-use plastic and paper in all business operations.
- Recycling all office waste in accordance with local authority requirements.
- Choosing suppliers and service providers who demonstrate a commitment to environmental responsibility.

6. MONITORING AND REVIEW

Overleaf Publishers Ltd will review our environmental performance annually as part of our Quality Management review. We will consider whether additional environmental commitments are appropriate as the business grows

and as environmental best practice evolves. Feedback on our environmental performance is welcome at info@chainsawcourses.com.

7. POLICY REVIEW

This policy will be reviewed annually. The version number and review date are updated at each review cycle.
