

Quality Management Policy

Overleaf Publishers Ltd · Version 1.0 · July 2026 · chainsawcourses.com

1. COMMITMENT TO QUALITY

Overleaf Publishers Ltd is committed to designing, developing, and delivering the Chainsaw Courses eLearning platform to the highest standards of educational quality. Our Quality Management Policy provides the framework within which we continuously review and improve our course content, assessment methodology, learner support, and platform performance. This policy is aligned with IIRSM course approval requirements and wider UK vocational training quality standards.

2. QUALITY OBJECTIVES

- Ensure all course content is accurate, current, and aligned with HSE, FISA, and legislative requirements.
- Achieve and maintain IIRSM eLearning Course Approval.
- Deliver a seamless, technically reliable platform experience for all learners.
- Maintain assessment validity and reliability at or above the 80% competency threshold.
- Respond to learner feedback within the timescales set out in the Complaints Procedure.
- Review and update course content at least annually, or immediately following any material change in regulation or guidance.

3. COURSE DESIGN AND DEVELOPMENT

All course content is developed by or under the direct supervision of a qualified chainsaw professional holding relevant NPTC/City & Guilds certificates of competence. Content is cross-referenced against the current HSE/FISA guidance series, UK legislation, and the Overleaf Chainsaw Manual. All quiz questions and mock examination items are reviewed for accuracy, clarity, and alignment with the stated learning outcomes before publication.

4. CONTENT REVIEW SCHEDULE

TRIGGER	ACTION REQUIRED
Annual scheduled review	Full content audit against current HSE/FISA guidance and legislation
New HSE or FISA publication	Targeted content review within 30 days of publication
Legislative change	Urgent content review; platform notice issued to active learners
Learner feedback flagging inaccuracy	Content review within 5 working days; correction if substantiated
IIRSM audit or feedback	Response and corrective action within timescales set by IIRSM

5. LEARNER FEEDBACK

Learner feedback is collected at the end of each training module via the in-platform feedback tool. Feedback is reviewed monthly by the course author and Director. Themes and trends are identified, and any content

improvements arising from feedback are documented in the quality improvement log. Aggregate feedback data is reported to IIRSM as part of the annual course approval review.

6. CONTINUOUS IMPROVEMENT

Quality improvement is an ongoing process. All complaints, appeals, feedback, internal verification outcomes, and audit results are reviewed and used to inform course improvements. A quality improvement log is maintained and reviewed quarterly. The Director has overall responsibility for quality and signs off all material changes to course content.

7. POLICY REVIEW

This Quality Management Policy will be reviewed annually or following any significant change in the regulatory environment, IIRSM requirements, or learner feedback. The version number and date are updated at each review.
