

Assessment Policy & Procedures

Overleaf Publishers Ltd — Chainsaw Courses Platform

Document Ref	Version	Issue Date	Next Review
Assessment Policy	1.0	July 2026	July 2027

1 | Policy Statement

Overleaf Publishers Ltd is committed to the design, delivery, and management of assessments that are valid, reliable, fair, and consistent. All assessments on the chainsawcourses.com platform are designed to accurately measure learner attainment of the stated learning outcomes for each module and for the course as a whole. This policy sets out the principles, procedures, and standards that govern all assessment activity.

2 | Assessment Design Principles

Principle	Application
Validity	Each assessment question is directly mapped to a stated learning outcome, ensuring the assessment measures what it is designed to measure
Reliability	Questions are randomised from a bank of 90+ items, ensuring consistency of difficulty and preventing memorisation of a fixed question set
Fairness	Questions are reviewed for cultural neutrality, accessibility, and freedom from bias prior to inclusion in the assessment bank
Sufficiency	The 45-question examination and per-module quizzes provide sufficient evidence of learner attainment across the full range of learning outcomes
Authenticity	Device-lock technology and activation code binding ensure that the person completing the assessment is the registered learner
Currency	Assessment content is reviewed annually and updated within 30 days of any legislative or guidance change
Transparency	Learners receive immediate feedback on assessment performance; module quiz results are shown per question; exam results are shown as a percentage

3 | Module Quizzes

Each of the seven training modules includes a knowledge check quiz. The following rules apply:

- Quizzes consist of 5–10 multiple-choice questions drawn from a module-specific question bank
- A minimum score of 80% is required to pass each module quiz
- Learners may reattempt the quiz an unlimited number of times without penalty
- The module video must be watched in full before the quiz is unlocked
- Quiz results are stored in the platform database and visible to the learner
- Passing a module quiz is required before the next module unlocks (sequential progression)

4 | Summative Examination

The final summative examination tests knowledge across all seven modules. The following conditions apply:

- 45 questions are selected at random from the full question bank for each attempt
- Questions are presented in randomised order within each attempt
- A minimum score of 80% (36 correct answers) is required to pass the examination
- Learners may reattempt the examination an unlimited number of times without penalty
- All examination attempts are logged with a timestamp and percentage score
- Certificates are issued automatically on first passing the examination

- The certificate records the learner's name, email, completion date, and course title

5 | Assessment Security

- Activation codes are single-use and bonded to the first device on which they are activated, preventing sharing
- Device ID is verified on each authenticated session to detect unauthorised access
- Dynamic watermarking on all video content displays the learner's name and email, discouraging sharing of recordings
- All assessment results are stored server-side; client-side manipulation of results is not possible
- Administrators can view all assessment attempts and flag anomalous patterns for investigation
- Suspected malpractice is dealt with under the Malpractice & Maladministration Policy

6 | Results, Feedback & Certification

- Module quiz results: immediate, per-question feedback with correct answer shown after submission
- Examination results: immediate overall percentage; pass/fail notification; certificate issued on pass
- Certificates are available to download as a PDF from the platform at any time after passing
- Learner progress data is retained for a minimum of 3 years after course completion
- Learners may request a transcript of their assessment results by contacting info@chainsawcourses.com

7 | Reasonable Adjustments in Assessment

Learners requiring reasonable adjustments in assessment should contact Overleaf Publishers Ltd prior to commencing the examination. Available adjustments and the application process are detailed in the Reasonable Adjustments Policy. Adjustments will be confirmed in writing within 5 working days of receipt of a request.

8 | Appeals

Learners who wish to appeal an assessment result or raise a concern about the fairness of an assessment question should do so under the formal Appeals Policy. Appeals must be submitted within 20 working days of the result being received.

9 | Question Bank Management

- The question bank is maintained by the Managing Director and reviewed annually
- New questions are drafted, reviewed for accuracy and fairness, and validated against learning outcomes before inclusion
- Retired questions are archived and not permanently deleted for a minimum of 3 years
- Any question found to be inaccurate, ambiguous, or biased following learner appeals will be removed from the active bank pending review
