

Internal Verification & Moderation Policy

Overleaf Publishers Ltd — Chainsaw Courses Platform

Document Ref	Version	Issue Date	Next Review
Internal Verification Policy	1.0	July 2026	July 2027

1 | Purpose & Scope

Internal verification (IV) is the quality assurance process by which Overleaf Publishers Ltd checks that all assessment activity is consistent, fair, valid, and reliable before, during, and after delivery. This policy sets out the IV procedures applied to the chainsawcourses.com platform assessment content, question bank, and certification processes.

2 | Internal Verification Activities

Stage	Activity	Responsibility
Pre-delivery	Review all new or revised quiz and examination questions for accuracy, fairness, mapping to learning outcomes, and clarity before deployment to the live platform	Managing Director
Pre-delivery	Verify that all module content accurately reflects current HSE guidance (AFAG series) and NPTC 0039-20 unit specifications	Managing Director
Pre-delivery	Test all platform functions including video playback, quiz logic, examination randomisation, progress tracking, and certificate generation prior to each version release	Managing Director / Developer
During delivery	Review learner feedback data quarterly for signals of ambiguous, unfair, or inaccurate assessment content	Managing Director
During delivery	Monitor examination pass rates and question-level performance data to identify anomalous or underperforming items	Managing Director
Post-delivery	Annual full review of all question bank items against current guidance; retiring or revising items that are no longer accurate or appropriate	Managing Director
Post-delivery	Review all appeals and complaints related to assessments; implement corrective actions and document findings	Managing Director

3 | Sampling

As the platform is fully automated, all examination attempts and results are logged and available for analysis. The following sampling approach is applied:

- 100% of assessment results are available for review via the administrator dashboard
- A sample of 10% of examination attempts is reviewed quarterly for anomalous patterns (e.g. very rapid completion times, repeated identical answers)
- All failed examination attempts where the learner contacts us for feedback are reviewed individually
- All appeals related to specific questions are investigated and the question reviewed by the Managing Director

4 | External Moderation

Overleaf Publishers Ltd is committed to seeking external moderation of its assessment content as part of its IIRSM and RoSPA approval obligations. Planned external moderation activities include:

- Submission of the full question bank and assessment specification to IIRSM as part of the course approval process
- Engaging a suitably qualified external assessor (holding NPTC 0039-20 or equivalent) to review the question bank on an annual basis
- Considering RoSPA qualification approval submission, which includes external scrutiny of assessment content and processes

5 | Records

Records of all internal verification activities will be maintained by the Managing Director and held for a minimum of 3 years.

Records will include:

- IV sampling records with dates, items reviewed, and outcomes
- Question bank version history including items added, revised, or retired with rationale
- Platform test records prior to each version release
- Examination pass rate data by cohort and by quarter
- External moderation reports and correspondence

6 | Continuous Improvement

Findings from internal verification activity will be used to drive continuous improvement of the assessment content and platform. All significant findings will be recorded in the quality improvement log and actioned within 30 days. The IV process itself will be reviewed annually as part of the overall Quality Management Policy review.
