

Reasonable Adjustments & Special Considerations Policy

Overleaf Publishers Ltd — Chainsaw Courses Platform

Document Ref	Version	Issue Date	Next Review
Reasonable Adjustments Policy	1.0	July 2026	July 2027

1 | Policy Statement

Overleaf Publishers Ltd recognises its legal duty under the Equality Act 2010 to make reasonable adjustments for learners with disabilities or other protected characteristics, where a provision, criterion, or practice would otherwise place them at a substantial disadvantage. This policy sets out the adjustments available and the process for requesting them.

2 | Definitions

Term	Definition
Reasonable Adjustment	A change to the standard way training or assessment is delivered that removes or reduces a substantial disadvantage for a learner with a disability or other need
Special Consideration	A post-assessment allowance made for a learner who was disadvantaged at the time of assessment due to circumstances beyond their control (e.g. bereavement, serious illness)
Disability	A physical or mental impairment that has a substantial and long-term adverse effect on a person's ability to carry out normal day-to-day activities (Equality Act 2010)
Additional Needs	Broader term encompassing learning difficulties, specific learning differences (e.g. dyslexia), sensory impairments, mental health conditions, and temporary conditions

3 | Available Adjustments

The following adjustments are currently available on the chainsawcourses.com platform:

Adjustment	How to Access
Extended time for examination	Contact info@chainsawcourses.com before commencing the exam — admin can note extended time entitlement on account
Text resizing and zoom	Platform is compatible with browser zoom to 200% without loss of functionality; all text is resizable
Screen reader compatibility	Platform HTML structure is screen-reader compatible; learners should use their preferred screen reader software
High contrast / dark mode	Platform supports system-level dark mode preferences via CSS media queries
Pause and resume video	All video content can be paused, rewound, and rewatched; Vimeo player supports caption display where captions are available
Unlimited time between modules	No time limit is imposed on progress between modules; learners may take as long as needed
Alternative format materials	The printed Overleaf Chainsaw Manual is available as a companion resource; contact us for large-print or alternative format requests

4 | How to Request an Adjustment

1. Contact Overleaf Publishers Ltd at info@chainsawcourses.com or in writing to 69 Newstead Avenue, Orpington, BR6 9RW

2. Describe the nature of the disability or additional need and the adjustment requested
3. Where relevant, provide supporting evidence (e.g. medical letter, educational psychologist report, GP letter)
4. Requests will be acknowledged within 2 working days and a decision communicated within 5 working days
5. Agreed adjustments will be confirmed in writing and applied to the learner's account

5 | Special Considerations

If a learner believes their assessment performance was adversely affected by circumstances beyond their control (e.g. bereavement, sudden illness, or a significant personal crisis occurring during an examination attempt), they may apply for special consideration. Applications must be submitted within 5 working days of the affected assessment attempt and must include supporting evidence where possible. Special consideration will not result in a pass being awarded to a learner who has not demonstrated the required standard; it may result in an opportunity for a free resit attempt.

6 | Confidentiality

All information provided in connection with reasonable adjustment or special consideration requests will be treated in strict confidence, handled in accordance with the Data Protection Policy, and not disclosed to any third party without the learner's explicit written consent, except where required by law.

7 | Review

This policy will be reviewed annually. Requests received and adjustments made will be monitored to identify any systemic access barriers that can be addressed through platform design improvements or additional support measures.
